## GM foods news, articles and information:

### [Monsanto: The world's poster child for corporate manipulation and deceit](#)

7/30/2010 - At a biotech industry conference in January 1999, a representative from Arthur Anderson, LLP explained how they had helped Monsanto design their strategic plan. First, his team asked Monsanto executives what their ideal future looked like in 15 to 20 years. The executives described a world with 100...

### [Join the Non-GMO Uprising \(Opinion\)](#)

2/8/2010 - For several years, The Institute for Responsible Technology has predicted that the US would soon experience a tipping point of consumer rejection against genetically modified foods. Now, in a December article in "Supermarket News", that prediction is supported and the non-GMO consciousness uprising...

### [Unwitting Public Consume More GMO Foods while Evidence of Harm Continues to Mount](#)

2/4/2010 - Most Americans do not want genetically modified foods and consider them dangerous. Because the U.S. does not require manufacturers to disclose genetically modified (GM or GMO) ingredients on the product labels, the public is largely unaware of when they are purchasing GM foods. Such foods are now found...

### [Scientist takes on the GMO industry](#)

11/28/2009 - The Organic and Non-GMO Report recently interviewed a California scientist and college professor who has published a paper critical of GMO science. The interview was published on The Organic Consumers Association website. Ph.D Agro-ecologist Don Lotter's 2009 paper titled "The Genetic Engineering..."

### [Why You Should Say No to GMOs \(Opinion\)](#)

10/15/2009 - Genetically modified organisms (GMOs) are the latest travesty thrust upon an unsuspecting public by the greedy, control minded corporations that see the Almighty Sign (\$) as the ultimate in achieving the highest "bottom line" possible. If you control the food supply you control the people. If you control...

## **Why and How to Avoid GMO Foods**

10/13/2009 - Author's Note The number 8 at the beginning of a PLU is not being used to identify GMOs. This from a recent article by Jeffrey Smith posted late Feb 2010 in Huffington Post. The 8 was proposed but never followed up on. Until Smith's recent post, all other sources used by the author were claiming the...

### **Review: The Future of Food, a must-see documentary that exposes the biotech threat to life on our planet**

5/3/2007 - There is a cabal of power-hungry corporations that are systematically destroying humanity's future. These companies have taken over the food supply, injected pesticides, viruses and invading genes into staple crops, engineered "terminator" genes that make crop seeds unviable, destroyed the livelihood...

### **Monsanto's GM corn MON863 shows kidney, liver toxicity in animal studies**

4/10/2007 - A variety of genetically modified corn that was approved for human consumption in 2006 caused signs of liver and kidney toxicity as well as hormonal changes in rats in a study performed by researchers from the independent Committee for Independent Research and Genetic Engineering at the University of...

### **Sick patients used as human guinea pigs in GM foods experiment**

4/3/2007 - Patients have been fed genetically modified (GM) Russet Burbank potatoes in an experiment to determine their nutritional effects on the human body. Developed by Monsanto, a multinational biotech company, the potatoes, modified to resist Colorado beetles, were dispensed to Russian heart and blood pressure...

### **Monsanto seeking USDA approval for 2nd-generation genetically modified soybean**

3/14/2007 - The USDA is currently reviewing the second generation of agricultural biotechnology giant Monsanto's "Roundup Ready" soybean for deregulation. If the USDA decides to deregulate, the crop could be planted and moved without permits or supervision, and it would probably be commercially introduced in 2009. Jump...

## **GM foods becoming an ecological disaster, warns institute**

9/5/2006 - Genetically modified (GM) foods are out of control, according to an article by Institute for Responsible Technology reporter Jeffrey M. Smith. In his article, Smith notes that the bright future promised by the makers of GM foods has turned into a disaster that threatens human health and the environment. Unintended...

### **Interview: non-GMO soy products for food manufacturers**

7/31/2005 - Steve: We're talking to Amy Nankivil. You're the International Marketing Manager for Northland Organic? Nankivil: Yes, Northland Organic Foods and Northland Seed and Grain; they are sister corporations. Northland

Organic Foods deals in certified organic foods, whole soy beans, grains and ingredients....
