

70 MILLION EXPIRED FLU VACCINES TO BE BURNED

Seventy million expired flu vaccines about to be incinerated as waste

By Mike Adams, NaturalNews Editor

July 2 - Forty million doses of H1N1 swine flu vaccine are about to go up in flames, and another 30 million will soon meet the same fate. They've expired, you see, and despite the CDC's best efforts to push flu vaccines...

Flu Vaccines, pharma fraud, quack science, the CDC and WHO -- all exposed by Richard Gale and Gary Null

By Mike Adams, NaturalNews Editor

July 2 - A remarkable article was published today by authors Richard Gale and Dr. Gary Null of the Progressive Radio Network (<http://www.progressiveradionetwork.com>). It may be the most shocking (and important) public...

Bitter melon extracts block breast cancer

By David Gutierrez, staff writer

July 2 - Extract of bitter melon appears to block growth and induce death of cancerous cells, according to a study conducted by researchers from the University of Colorado and Saint Louis University, and published in...

High-glycemic carbohydrates lead to heart disease

By Ethan A. Huff, staff writer

July 2 - A recent Italian study has found that women who eat diets rich in high-glycemic carbohydrates double their risk of developing coronary heart disease. Published in the journal Archives of Internal Medicine, the...

Developing nations face environmental crisis from e-waste

By David Gutierrez, staff writer

July 2 - Developing nations will face a major environmental and public health crisis from e-waste if they do not quickly put in place measures for safe recycling and disposal of electronics, the U.N. Environmental Program...

Can you really eat your way to happiness? The mood food connection

By Mike Adams, NaturalNews Editor

July 1 - Yes, you really can eat your way to happiness, but perhaps not in the way you might first imagine. By "happiness," I

mean lasting happiness, not the fleeting kind of sensory happiness that might be experienced...

Baby making industry creating children with malformations, parents not told of risks

By S. L. Baker, features writer

July 1 - If you get your information about assisted reproduction technologies (ART) such as in vitro fertilization (IVF) and intracytoplasmic sperm injection (ICSI) from the mainstream media, you may think these are...

Weight Loss Drugs Produce Only Minimal Weight Loss, Even After Taking Them for Years

By David Gutierrez, staff writer

July 1 - Weight loss drugs may result only in minor weight loss, even after long-term use, according to a new study conducted by Brazilian and Canadian researchers and published in the British Medical Journal. Researchers...

Triclosan may be harmful to health, says FDA

By Ethan A. Huff, staff writer

July 1 - The FDA is reevaluating the safety of a popular chemical additive called triclosan, based on recent studies that seem to indicate it causes endocrine disruption in the body and leads to the emergence of drug...

BPA plastics chemical now linked to asthma

By David Gutierrez, staff writer

July 1 - The controversial chemical bisphenol-A (BPA), already linked to a wide array of health problems, may also increase the risk of asthma in children, according to a study conducted by researchers from the University...

Gourmet "truly raw" organic almond butter from Sicily now available at NaturalNews Store

By Mike Adams, NaturalNews Editor

June 30 - Thanks to efforts by the USDA and the Almond Board of California, it is illegal for commercial almond producers in the United States to sell raw almonds. The almonds now have to be fumigated with chemicals or...

Secrets of chelation revealed on NaturalNews Talk Hour

By Mike Adams, NaturalNews Editor

June 30 - This week's NaturalNews Talk Hour presents "Beyond Chelation - How to Stop Heart Attacks". Take the steps necessary to empower yourself to go beyond the limitations of misleading dis-ease labels. It's time to...

Low vitamin D levels linked to poor blood sugar control in type 2 diabetes

By S. L. Baker, features writer

June 30 - According to the National Institutes of Health (NIH), almost 11 percent of Americans age 20 or older have diabetes. And the most common form of this disease, type 2 diabetes, has reached epidemic proportions...

95 percent of "preventive" mastectomies offer no benefit, study finds

By David Gutierrez, staff writer

June 30 - A new study shows that the increasingly popular practice of "preventive mastectomy" in non-cancerous breasts provides no benefit to the vast majority of women. "It's important for women to understand that..."

Nutrition labels could be mandated on package fronts

By Ethan A. Huff, staff writer

June 30 - According to the Secretary of Health and Human Services (HHS), Kathleen Sebelius, the FDA is working on a plan that would require food manufacturers to print nutrition information on the front of their packaging...

Doctors test cure for peanut allergy

By David Gutierrez, staff writer

June 30 - Doctors from Cambridge University are testing a technique that they believe may functionally cure people who suffer from inconvenient and dangerous peanut allergies, researcher Andrew Clark announced at the...
