 [Granny Storm Crow's list-July 2009](#)

How this list came about-

"If the truth won't do, then something is wrong!"

Those were the furious words of my grandfather to my Mother. I had walked in from joyfully stuffing my face with red raspberries in the garden, straight into "war zone"! My gentle grandfather in a fury, his hand raised! Mom was just beginning to shrink back away from him. They saw me and quickly sent me away. But it was too late, the scene and the words were seared into my 5-year-old brain. That was over 55 years ago, but I still remember it clearly. My grandfather was a minister, one very short step away from God in my 5 year old mind. It was one of those life changing moments. It is still rare for me to tell a lie. I never found out what my Mother's lie was.

As I child, I suffered a traumatic head injury. Another child tried to murder me with a hammer. I was left with frequent migraines. At 19, like many rebellious teens, I tried cannabis. It took about a year for me to make the connection between using cannabis and the absence of my normally frequent migraines. I have used cannabis ever since.

I am an avid reader. While perusing an old book on herbal medicine, I read how the little old ladies of Mexico made and used a cannabis/tequila rub on their arthritic hands. Then I met Joey, an epileptic musician. He told me another interesting fact- when he had pot he could cut his medication in half! On a camping trip years later, I smelled an unmistakable odor. Following my nose, I was totally shocked to find a grandmotherly lady in her 70s puffing away on a delicate oriental pipe. "Parkinson's. And the pot's way cheaper than the pills!" Her nephew kept her well supplied, she said. We had a nice chat about various medical uses of cannabis.

Epilepsy, Parkinson's, arthritis, and my migraines! What else was it good for? Yet every news article

on cannabis that I saw, claimed one new horror after another. Men grew breasts and were impotent. Women became sterile or miscarried. It made you crazy and murderous. Made you lazy and do nothing. It caused cancer and heart attacks ... What I had learned on my own and from others and what I was being told in the press were so different!

What was the truth? I began researching. I printed the first studies up and kept them in a notebook, just as a personal reference. The notebook quickly filled. I started a Word file of the URLs and on July 30 2007, I posted it. It continues to grow.

Here's some of what I have found. All I've done is copy the URLs, then put them all in some semblance order for everyone to use as a reference. Please feel free to share this list with anyone who could benefit from it.

Granny's MMJ List- July 2010

Granny Storm Crow's MMJ Reference List- July 2010

This is my third year of sharing "Granny's list" with all of you. Last year, I told you "How this list came about." This year, it's "Why you should be sharing my list!"

From 60 pages, a symbolic celebration of my then 60 years on Earth, my list has grown to an equally symbolic 420 pages of links, in hopeful anticipation of it's re-legalization in California this fall and the dawning of medical freedom in other states.

My "Granny's list" contains 100s of studies about cannabis and how it heals- all done in an environment of "strong discouragement" on the part of the US government. How large my collection would be if research into this healing herb had been unrestricted? What would we know if we could have researched during those 70- odd years of prohibition?

As a medicine, cannabis is potentially invaluable- this collection is ample proof of that! From stopping hiccups, to halting breast cancer's terrible spread, cannabis works! But there are still too many "may"s and "might"s when it comes to cannabis. We need more research, which will not, and cannot, happen until cannabis is legalized and rescheduled.

When I began using cannabis medically over 40 years ago, there was no such thing as "medical use"- not even the concept existed! Education has made the difference. Somewhere along the line, every one of the people who have voted to legalize medical use in their state, learned that cannabis was an effective medicine, perhaps from a relative's use, or from a program they saw, or a study they read. They learned the truth.

In a Canadian survey of doctors, a majority admitted that most of what they knew about cannabis came from their patients! They had learned only the "government line" in medical school. That was in Canada, where medical use is federally legal! So how much does your doctor really know about cannabis? My list gives you a way to educate him.

And you shouldn't stop with your doctor. Local city councilmen and commissioners have the power to ban dispensaries through local ordinances. It is easier to educate them before it's an issue. They need the medical facts about cannabis to make logical decisions!

We all know someone who has diabetes, fibro, cancer or MS. They shouldn't have to suffer, physically, financially, or legally, for using an herbal medicine. One they could easily grow if sane cannabis laws were in place. Home-grown is cheaper than any pill!

Cannabis, with its remarkable safety record, should be the first medicine tried, not be the medicine of last resort! It is only by educating others, that we can bring cannabis back into mainstream medicine where it belongs. Please share the facts about cannabis with those around you, and back them up with medical studies from my list.

The simple truth is "Cannabis heals". And as my wise old grandfather once said, "If the truth won't do, then something is wrong!"

"If the truth won't do, then something is wrong!"

Granny's Granddad- Rev. John Schwabenland

420 pages of MMJ links!

<http://forum.grasscity.com/medical-m...ly-2010-a.html>

"Granny's list" as a facebook page-

<http://www.facebook.com/pages/Granny...0974909?ref=nf>

Want your own **free** copy of my list? Email me at-
i.wantgrannyslist(at)greenpassion.org

Re: Granny's MMJ List- July 2010

Well, there it is, kids- 420 pages of MMJ studies and articles!

Well, when are you going to send an email to your old Granny? You **NEED** to get your copy if we are going to "High jack" the elections this year! You have a lot of people to educate! I've done the hard part- putting it all together- all you have to do is share the list!

My email is- **i.wantgrannyslist(at)greenpassion.org**

I want to smoke a LEGAL joint next April 20th, in memory of Jack Herer. I want to smoke it outside with all the neighbors watching!

And think of this- if cannabis is legalized for all adults in California, **THERE WILL BE NO MORE CALIFORNIA JOB DRUG TESTS!**

Why would an employer test for a LEGAL drug? (except in case of an accidents- just like you would for legal alcohol, etc)

We need to make my list common knowledge! I'm just one little old lady- and look at the splash I've made! My list can be found in Russia, New Zealand, South Africa, Brazil, Wales, and several other countries! How about giving me a hand? Forward the list to others! Make the difference! Change the world with me!

Granny
